# IISWC'24 CALL FOR TUTORIALS AND WORKSHOPS

Tutorials and workshops are a crucial element of the IISWC experience and provide an essential platform for sharing and expanding knowledge on simulation tools, benchmark suites, and evaluation methodologies. We are also excited to see you explore emerging application domains such as Cloud performance, Microservices, Visual Computing, AI/ML, and Security.

We are actively seeking proposals for engaging and insightful tutorials and workshops to precede the main conference. This year, all sessions will be conducted in person, offering formats ranging from lightweight 2-hour introductions to comprehensive full-day immersions. This is an opportunity to share your valuable insights with both the hardware and software communities.

## Submission Guidelines

Please direct your tutorial and workshop proposals to ashriram@cs.sfu.ca, including the following information:
- Session Type: Tutorial or Workshop
- Session Title
- List of Organizers
- Abstract: A brief summary of the session content
- Duration: 2 hours, half day, or full day
- Planning Requirements: Any specific planning needs for your session

## Deadlines

Proposal Deadline: June 2, 2024
Acceptance Notification: June 9, 2024
Date of Tutorial/Workshop: September 15, 2024

We encourage you to take this opportunity to lead a session that advances understanding and innovation in key areas of computer science and technology.
